DON'T SAY IT --- W[illegible]

DATE 5/18/83

TO Prater / Rieger

FROM E. L. Hilty

Info: P. Eddy - V. McGhan

Ref: Selected Golden Well Improvements:

Past discussion's indicated your intent to improve certain Golden Well sites to the point of them becoming viable ground water sampling points supporting the Bank Storage Study. As I have explained, a feasibility study of each considered site along with a general work description (depth + condition of existing casing, site accessability + location, est. of casing additions, est. perforation schedules, pump installations, etc, etc.) is required.

We are now one third complete on the current well Maint. contract and should be finished in July. If no "special work" drilling plans are in place by then, the contractor will be released.
