Subject Funding for Geophysical Log Interpretation

As we discussed on the phone, I have increased the authorized funds on the Geophysical Log Interpretation Task to $11,000. Your old work order (B40933) has been supplemented by $2,000, and I have written you a new work order (B40940) for $3,000.

This increased funding should allow you to complete the three tasks listed below.

1. Develop the capability to modify the logs interactively on the scope prior to printing them out.

2. Develop the capability to output data from the system to the CALCOMP plotter.

3. Develop the capability to keep an on-line QA file documenting any editorial changes that are made to the logs.

Any funding that is left after these tasks are completed should be used to digitize more logs.
