Subject Space Needs - Environmental Evaluations

Following are my additional space needs for CY-1983 and CY-1984.

| | CY-1983 | CY-1984 | Location |
|---|---|---|---|
| Office Space | 2 | 2 | 300 Area |
| Lab/Shop Space | 200 sq ft | -- | 300 Area |
| Boat Storage | 30' X 20' | -- | 300 Area Preferred |

Additionally, if/when we are evicted from 318A, we will need 600 sq ft of storage space near 318TR3.

Further, there has been pressure to relocate field lab and storage from the Hanford townsite to the 622R vicinity. We have been receptive to this move only because of the pressure and the promise of acceptable facilities in that area. My staff is of the opinion that the Quonset facilities at 622R are in such poor repair and status (contaminated with fluorescein dye) that they are unacceptable for our use. For this reason and because the Hanford townsite is more central to our ground-water work we would prefer to keep that location/facility. We do need additional security there, however. The trailers and storage area should be fenced with chain link to form a 100' X 100' secured area.
