Subject Hanford Site Wide Exercise "Charlie"

A Hanford site wide emergency response exercise is scheduled to take place during April. Westinghouse is the event contractor for exercise "Charlie" which is intended to test emergency response during the "off-shift".

Environmental Evaluations personnel will be expected to provide UDAC and environmental monitoring support. Our response to this exercise should be the same as would occur during an actual emergency to the extent that personnel or laboratory safety is not jeopardized.

Our current plans are to notify Radiation Protection Technologists to respond, on emergency call out pay, for the drill. You will be instructed by phone where to report. In all communications concerning the drill, the code name "Charlie" will be used to identify the exercise as a drill and not a true emergency. Your participation and cooperation for the drill will be appreciated.
