U.S. DEPARTMENT OF ENERGY

memorandum

DATE October 8, 1982

REPLY TO ATTN OF EP-321

SUBJECT Abstract for 4th DOE Environmental Protection Information Meeting

TO: P. A. Eddy and L. S. Prater

Abstract Title: "Report on Ground-water Monitoring Practices at U.S. Department of Energy Facilities"

The program Committee has asked me to notify you that your proposed paper for the meeting in Denver in December 1982 was not accepted. The response to our Call for Abstracts was most satisfying, but resulted in submission of many more abstracts than could be included in the limited time available. We hope that your attendance at the meeting will not be affected by this decision and encourage you to try again for the next Information Meeting planned for early 1984.

Carl M. Welty Jr.

Chairman, Program Committee
Operational Safety, Health
and Environment Division
Office of Operational Safety
