Subject Monthly Report - July 1982

During the month of July, I worked almost exclusively on Task 8 of Jack Corley's program. I spent the first part of the month making final preparations for the site visits that I scheduled for mid-July. Before departing on my trip, I composed (for each site) a list of topics to discuss. I departed on July 10 and spent almost two weeks traveling. I visited the Oak Ridge National Laboratory, the Oak Ridge Gaseous Diffusion Plant, the DOE Y-12 Plant, the Strategic Petroleum Reserve Office, and the Bartlesville Energy Technology Center. I will soon be sending out a more detailed trip report outlining the discussions I had with site officials at each of the facilities.
