Subject Aquifer Testing - FY-1983

I expect to be able to conduct at least five aquifer tests in FY-1983. I might be able to do more than five tests if the equipment remains in good operating condition.

The following wells have been selected for testing in FY-1983:

699-2-3
699-35-9
699-40-1
699-S12-3
699-54-17B

These wells have been chosen because they are in locations of interest to other tasks under the Ground-Water Surveillance Program. Other wells will be tested if time and funding allow. I do not plan to purchase any major equipment during FY-1983.

As in FY-1982, personnel and equipment from the Well Maintenance Task will be needed to help with pump installation.

The only milestone that I plan to have is for a written report on the year's testing, to be completed at the end of the year.
