use two new programs: LOGDAT and LOGHDR. These two programs are used to manipulate digitized log data.

I digitized several logs from selected wells (DC15, DC14, and DC12).

Task 8 - Evaluation of Ground Water Monitoring Progams

I wrote a draft of the introductory section of a report about this task.

Miscellaneous Activities

I helped N. Scharnhorst gather well perforations data for R.S. Argo. These data will be checked against data already in the CIRMIS system, and corrections will be made in the data base as needed.

I attended the National Water Well
