- Well Maintenance

  Pumps were installed in four wells in the 100K Area: These included 100K-27, 100K-28, 100K-29 and 100K-30. All pumps performed adequately after installation.

- Data Base Maintenance

  Several attempts have been made to bring the Tektronix 4051 on line via a phoneline with the Water and Land Computer. To date, we have been unsuccessful.

- I-129

  Pumps have been installed in the wells that were drilled last fiscal year. Samples are scheduled to be taken during January.

- Meetings

  C. S. Cline met with Morris Hall and Mike Graham of the Rockwell Hydrological Sciences Unit and Andy Reisenauer of Battelle. A coordinated effort to obtain aquifer testing data and update present groundwater flow models was discussed. Areas needing additional data were delineated.
