Subject Monthly Report - May 1982

All the Environmental Monitors attended a refresher training class on Liquid Scintillation Counters. The class was conducted by Radiation Monitoring.

The maximum dose from the 377 building was 700 uR/hr at fence, 120 uR/hr at roadside, and 20 uR/hr at 3705 TLD location.

We have three Krypton samplers in operation; they are, 300 Pond, Prosser Barricade, and Sunnyside.

There were six special well samples collected from 100 B area and vicinity. The samples were delivered to UST for ^{90}Sr analysis. All 100 N and four 100 K wells had an extra gallon collected for UNC.

Hanford water sampler ran out of fuel and was out of service for several days. It is now back in operation.

The Riverview and EFG sector meat samples have been collected.
