Subject Monthly Report - March 1982

All routine environmental monitoring schedules are up to date.

We sampled 11 deer this month. They were all collared deer that were sacrificed.

M. R. Quarders, R. L. Dirkes, and 5 environmental monitors attended the gun safety training at the Rockwell firing range. All of us that attended passed.

Completed PP&L location. The road monitors went along roads and railroad tracks and collected soil samples from each access corridor.

We had two instances that required extra air sampling this month. We changed our 600 filter at 200 E area on March 9, 1982 because of stack emission. We changed several filters on March 14, 1982 because of a fire at the 303-K building. When turned into UST, all filters were less than background on portable instruments.

The following wells were not samples for various reasons.

699 20-20	test equipment on well
699 20-E12-0	p-tube plugged
699 19-44	dry, removed from schedule
699 48-7	recorder on well

DOE credit calls
Nothing to report
