Subject Monthly Report - December 1981

We had a lost time injury this month when Steve Bivins had an auto accident. He hit black ice on highway 12 and 4th Street overpass in Pasco. He was on his way to Moses Lake and other northern sample locations. He totaled out a plymouth station wagon no. 1D 2622. It has been replaced with a sedan.

We had two holidays this period so the trips were a little bit changed around to complete everything.

Dave Merrill spent several days with Keith Price looking for and surveying pigeon droppings. They found some with about 200 c/m above background at the old Hanford pump house. Samples were collected and sent to UST.

There were two road killed deer this month.

Started replacing hoses on air sampling locations. Have all on plant and close in off plant completed.

Spend one weekend surveying land for release to PP&L. Six monitors worked Saturday and Sunday. Mel Quarders Saturday and Roger Dirkes worked Sunday.

This was the thirteenth month for 1981 so the only test wells were water quality and HEHF.

DOE credit calls

Nothing to report
