Subject Monthly Report - August 1981

Test wells are behind schedule this month due to both trucks being in the garage for several weeks. We have them both back and are running two crews a day, when we can.

Environmental has Gordon Andersen borrowed from Radiation Monitoring until September 30, 1981. He is filling in for vacation and sick leave.

Larry Belt is back after four weeks of sickness.

Completed the annual soil and vegetation samples plus some extra ones for Keith Price.

Bob Cushing was involved in a hit and run accident. He was on the RR maintenance road and a private vehicle was speeding along side-swiped him and kept going. The vehicle has still not been located, it is believed to be a green Subaru.

There were two road kills this month, both in the vicinity of Rt. 4-S mile 20, one Saturday morning about 5 a.m.

Completed temperature traverse for UNI at Priest Rapids Gage Station.
