Subject Monthly Report - January 1981

We have started the new year with revised trip schedules and so far they seem to be working out. A few dates and labels have had to be changed to make everything match.

Because of the holidays at the end of December, we had a short month to get routine work done. Everything was completed by working 4 monitors one day overtime on test wells.

The 600 air samples were moved from FFTF (400 Area) to 200 E Area. Dual $^{3}H$ sieves were installed at 700 Area and Benton City air sample locations.

The following wells had a few difficulties this month:

- 699-8-32 has 110 V plug for the pump
- 699-35-78 pumps very slow
- 699-37-43 pump not working
- 699-45-4 pumping a lot of sand
- 699-40-33 test pump in well

DOE phone calls
Nothing to report
