Subject Monthly Report - December 1980

The fallout sampling was discontinued on December 3, 1980. The air sample location at 400 N was relocated a few feet so a new fence could be built. The water sampler at 100 B is being discontinued and replaced with one at Priest Rapids Dam. It will be a weekly integrated sample.

All test wells were sampled this month except R299E28-23. It is not on a map and Rockwell could not locate for us. All wells this month were water quality samples.

M. R. Quarders and R. L. Dirkes attended a Bomb Squad training session presented by a member of the Richland Police Bomb Squad.

We have had three road killed deer this month.

DOE phone calls
Nothing to report

Merry Christmas and a Happy New Year
