Subject Monthly Report - November 1980

Environmental Monitoring participated in a plant wide practice excercise, operation pumpkin on October 30, 1980. We had 4 monitors and 3 vehicles participating.

We are continuing to sample for fallout 3 days a week, and the sampling has been reduced to milk only. One dairy in the Basin is showing an increase of ^{131}I.

Cameron Andersen had an accident on November 4, 1980 totaling out ID-1860. So far we have not been successful at getting a replacement. Have been working him on weekends only until a vehicle is available.

Environmental has been operating short handed this month. We have had 7 days vacation, 2 days personal business and 4 days sick time. Worked 2 men overtime on 2 Saturdays, and borrowed a man from Radiation Monitoring for 2 days.

Several test wells were unable to be sampled. The numbers were given to C. Cline or E. Hilty for repairs. 100 B water sampler was repaired and is now operating.

Sampled 2 road killed deer this month.

All routine environmental work is up-to-date.

DOE telephone calls
nothing to report.
