Subject Monthly Report October 1980

Routine Environmental monitoring has been kept on schedule except for the Moses Lake, Othello filters and TLD's. The Mountain blew that day so John Harrison was called back.

The following test wells were not sampled:

299E	25-2	Fenced in
299W	19-4	Dry
299W	19-3	Dry
299W	22-22	Dry
699	39-79	Fenced in

Mark Mann terminated and Cameron Andersen was hired to replace him on 10-10-80. John Lucas is transferring to Biology is off 10-27-80. No replacement will be required for him.

Several days were spent finding and picking up some particles Co^{60}. A contaminated leaf was found at 100 F slough, but no other contaminated leaves or bushes could be found.

We have had a run on deer sampling the last two weeks. There has been four road kills, and we have collected the thyroids from the last two.

The Chinese have done it to us again. We have been doing fallout sampling on a daily basis since Saturday, October 18, 1980. We are sampling three milk locations and three air sample locations.

Wayne Kings father passed away so he has been off for a week. Jerry Martin loaned Gordon Andersen for two days to help out on the shoreline TLD run.
