Dear John:

I am starting the Ground-Water Protection Program document through our clearance process today. If we wait any longer for additional comments, it will not be possible to issue the document before the end of the fiscal year. A copy of the revised document is enclosed. We have incorporated most of the changes that you initially suggested. The document has gone through several reviews and changes, and additional editing will be done while clearance is in progress. We would appreciate any additional comments that you may have, although significant changes cannot be made in document context without repeating the clearance procedure.

I am now working on revision of the Implementation ("How-To") guide for ground-water monitoring.

Please call me if you have any questions or need additional information.

Sincerely,

John

J. R. Raymond
Staff Scientist
