Subject Letter of Commendation for P. J. Mitchell

I would like to acknowledge the many improvements that Pam Mitchell has made in the data handling services performed by the Geosciences Department for the Hanford Ground-Water Surveillance Program. Since Pam assumed responsibility for this effort, response to our requests for information from the data base has greatly improved; not only do we get the product sooner, but in many cases the quality is better than before. One example of this is the listing of contaminant data included in our annual report. This year, without prodding from us, Pam arranged to have it printed on a letter-quality printer, which produced a much nicer listing than the ones used in previous years. I really appreciate Pam's willingness to seek out and implement improvements such as this one. Pam is a very conscientious, capable staff member, and I am pleased to have her as the manager of our data base.
