Subject New Management Assignments

It is a pleasure to inform you that Dr. Douglas E. Olesen has been elected Executive Vice President of Battelle Memorial Institute by the Board of Trustees, and that Dr. William R. Wiley has been appointed to succeed him as Director of Battelle's Pacific Northwest Division, effective today.

In his new assignment, Dr. Olesen will report to Institute President Dr. Ronald S. Paul. He will assume direct line management responsibilities for Battelle-Northwest today; for Battelle-Columbus, the Project Management Division, and the Corporate marketing function, July 1; and for Battelle-Frankfurt and Battelle-Geneva, August 1. Additional assignments will be communicated later.

Dr. Olesen, who was named Director of Battelle-Northwest and elected a Vice President of the Institute in 1979, has been a member of the Battelle staff in Richland since 1967. He has led research in such areas as high-rate water treatment, municipal and industrial waste management, and water and land resources planning and management. He earned his B.S., M.S., and Ph.D. degrees in civil engineering at the University of Washington.

Dr. Wiley, most recently Director of Research at the Pacific Northwest Laboratories, has been a member of the Battelle staff at Richland since 1965. Much of his work has been involved in molecular and cellular biology: He earned a B.S. in chemistry at Tougaloo College, an M.S. in microbiology at the University of Illinois, and a Ph.D. in bacteriology from Washington State University.
