Date July 25, 1984

To WE Kennedy, Jr.

From JR Raymond

Subject Telecon from S. P. Mathur

John Mathur called me on Monday, July 16, 1984 to acknowledge receipt of the document draft: Guidelines for a U.S. Department of Energy Ground-Water Protection Program. John is having additional review of the document made at DOE Headquarters while it is progressing through clearance at PNL. He indicated that I should be prepared to discuss the document (and any changes required by Headquarters) with them in D.C. after their review. However, such a trip is not in the project budget, and would impact adversely on completion of the remaining work on the task, namely, revision of the monitoring procedures document. In addition, I think that the trip would be unnecessary, because discussion of the document can be carried out by telephone and letter.
