Date: 2-27-84

TO: Paul Eddy, Phil Branson

From: Harold Larson

Subject: Call to Lloyd Kuslar (373-1070)

I wanted to Lloyd the following:

1. Before Mike Graham left the old Hydrogeology unit, we had a close working relationship, and we want to maintain this relationship.

2. Therefore, we are available to help them on an interim basis, we are currently doing their sampling, done re medial work on wells (Elkhorn) and some logging (Verne McGhee).

3. We are better equipped to meet their needs, because of our past experience with both the Hanford programs.

4. We have senior people like Paul Eddy, John Raymond, etc. To help review data, do special studies and review and up-date their program.

Lloyd stated:

1. He is currently reviewing their program, & will be through the review in one week.

2. In the interim he has given a work order to George Last & Mike Graham for consultant type work.

3. He will set up a meeting in one week with Branson, Eddy & Larson to see what data of the program he wants us to do (after his review).
