City Richland State WA Zip 99352

Phone Number (509) 376-4188

Name of Project Organics Testing

If concluded, when?

If ongoing, when scheduled to be concluded? September 1985

Briefly describe project. The objectives of this study are to identify areas of the Hanford Site where organics are present in the ground water, to determine the types and concentrations of these chemicals, and to make a recommendation as to whether a routine organics sampling program should be added to the existing ground-water sampling program. This study includes the purchase and testing of special equipment for sampling organics, as well as the collection and analysis of 50-100 samples from all areas of the Hanford Site.
