Subject CRBR Equipment Availability

Harold Clouse, Manager of Property Accounting, has received a listing of DOE equipment that could be available to PNL from the termination of the CRBR project. ORNL and the FFTF project are getting first choice of the equipment but it seems there is still a substantial amount of equipment that is still available.

The equipment can be acquired at minimal cost. The book value of the equipment is transferred to PNL's account as a bookkeeping entry, with no impact to your current capital equipment budgets. The FFTF project will be shipping a barge-load of equipment to Richland and they have agreed to provide free transportation for any PNL equipment.

The listing is located in Harold Clouse's 3760 trailer and any equipment you may be interested in must be identified by Wednesday, April 4. The timing is very short but we are fortunate to have any chance at all at acquiring this equipment.

If you have any questions please give Harold Clouse a call on 376-3227.
