Subject SUMMER EMPLOYMENT OF STUDENTS

It is time to review your needs for student employees for the upcoming summer. We have received applications from a number of qualified candidates from schools all over the country and in every discipline. The stronger candidates have completed their junior year or are graduate students and are usually committed by the middle of April. If you would like to review the applications we have received or have an interest in students from a specific school and/or discipline, please contact me as soon as possible.

If you are able to place a minority student who has completed his or her junior year in college in science, engineering, or business, we have candidates for your consideration.

Please advise me of your needs as soon as possible for summer placement.
