To AC Rither, Manager, Subcontracts

From JR Raymond, Staff Scientist, Environmental Evaluations

Subject Subcontract B-F6265-A-H Computer Modeling Studies on the Effects of Drilling Fluid Invasion on Hydraulic Characterization of Low Permeability Horizons. (S.A. Holditch & Associates, Inc.)

I want to express my appreciation for the work that AO Olsen has done for us on the subject subcontract. We required rapid implementation of the work because of our sponsor's time constraints. Art assisted us in developing a concise work statement for tasks that were difficult to define clearly. He efficiently issued bid requests and placed the contract within our time frame. He also expedited several contract changes and time extensions. It was a pleasure working with Art, and his responsiveness certainly made our job easier in meeting the sponsor's requirements.

Thanks for a job well done.
