Subject Monthly Report - July 1984

Work continues on BWIP McGee borehole interval reports. The writing of Test #14 will be completed by the end of the month, but will require editing and graphics/photography work.

The proposal for sampling and testing in the 200-East Area was completed and sent to Wade Chapman-Riggsbee of Rockwell. He has indicated that money should be available for part, if not all, of the proposed work.

I attended a demonstration of an organic sampling pump at the HAPO Building. Well Wizard of Portland, Oregon was trying to sell this product. The pump would be a dedicated system capable of sampling organics without losing much of the sample by sorption to the equipment.
