Subject Monthly Report - April 1984

Geophysical Logging

Ripped the edges off the last logs from wells DC-19, 20 and 22 and delivered them to Steve R. Strait, drilling and testing manager for Rockwell.

Assisted V. L. McGhan in cleaning out the geophysical logging van and explaining the capabilities of the van to 30 students from Washington State University, the University of Idaho and Boise State University.

Wrote the newly surveyed coordinates on logs from wells DC-16, 19, 20 and 22.

Other Activities

Completed the nitrate map and nitrate report, which goes into the 1983 annual report.

Completed the quality control report for the 1983 annual report.

Made a fence diagram and cross section of the stratigrapy around 1325-N crib.

Rolled 2000 ft of fire hose used in a pump test near the 1325-N crib and delivered part of it to the 300 Area fire station, another part to Rockwell and the final section to the Meteorologic Tower.

Attended a propane fuel training class, which will enable me to safely and efficiently fill our propane vehicles.

Examined the internal parts of the exploratory shaft drilling rig at RRL 2.

Picked up Stevens recorders from wells 699-48-7, 699-15-4, and 699-39-E3 and delivered them to the Meteorologic Tower.

Spent one week in Utah skiing.
