Subject Monthly Report - February 1984

The month of February was predominantly spent writing McGee borehole interval reports for the BWIP. The Sentinel Bluffs #3 (Rocky Coulee) flow top test report was completed. The Sentinel Bluffs #2 and Vantage interbed reports were reviewed and final drafts turned in for typing and eventual distribution for BWIP peer review.

Karen Oster has been doing a good job of reviewing and constructing figures for the various reports. The details that I tend to miss, she will ordinarily find and correct.

John R. Raymond is presently writing the McGee interval - test #12 (Rocky Coulee flow bottom) report. We have both plotted data from tests conducted on this interval to glean as much information as possible.
