Subject Monthly Report - January 1984

Data files and reports were examined by the NRC this month as part of the requirements for placing a nuclear waste storage shaft within Hanford Site boundaries. The McGee well had been drilled and tested since the previous NRC inspection, and so a great quantity of data had to be digested during the week of the NRC visit. A report of the results of that visit should be available soon.

During this past month, I have moved my office from MO-410 trailer in the RRL to Room 9 in 318TR3.

Writing will continue on interval reports from this new location.
