Technical Services

- CIRMIS

  There have been some changes in manpower for the data handling task. DW Damschen is transferring to another department. He is currently training CA Newbill to take his place. DW Damschen will be back part time in January to ensure that data retrieval for our annual report goes smoothly.

  Data for some "499" wells (at the FFTF) have been received for the first time, requiring expansion of the data base to accommodate the new group of wells.
