Subject Monthly Report - November 1983

Purchase requisitions have been written for special pumps for the organics task and for a ground-water flow meter. These have been sent to Purchasing for bid purposes only, so that we will be ready to order them as soon as capital funds become available.

Dale Washburn and I attended a demonstration of the CIRMIS system at Sigma V. I introduced Dale to Pam Mitchell and we discussed the work that Dale is doing with several ground-water analytical reports dated 1956 to 1961. Pam explained the format required for this data to be entered into the data base. When Dale has compiled all the data in the proper format, he will be shown how to enter it into the computer.

Leigh Prater and I attended the annual meeting of the Geological Society of America in Indianapolis from October 31-November 3. I presented our talk entitled "Interactions of the Columbia River and the Unconfined Aquifer at the Hanford Site." We received several compliments on the presentation, especially regarding our slides. I have passed on these compliments to the appropriate people in Photography and Graphics.
