

Appendix III

Spacing at morpheme boundary: measure

The sorted lists making up most of this appendix contain the same items that make up the lists in Appendix II. But here the word-constituent morpheme pairs are grouped according to the spacing numeral that separates them in the transcription of the text.

Within each list based on the spacing numeral between the morphemes, the order of items is that of the phonological features of the final segmental element of the first morpheme; the order of features is the same as that used in Appendix II: vocalic element, consonantal element, and other graphic symbols, with ordered subdivisions in the first two of these groups.

Excerpt: lines 1-661 (Exordium – Fitt IX)

0018	bēo- 0 -wulf	bēo-wulf wæs brēme
