- Notes:**
- (i) Disbursements data are as of 31 May 1997. Some donors have not submitted their 1996 disbursement information to CDC/CRDB.
  - (ii) All disbursements information reported by donors are reconverted from original currency of disbursement into US dollars, based on the United Nations official exchange rate.
  - (iii) Amounts in each table have been rounded off (to the nearest thousand of US dollars) and some small variations may be encountered in comparing with more detailed data in Annex 2 (to be distributed separately).
  - (iv) Due to enhancements in the ease of project classification and increased accuracy, donor agencies and NGOs have reported more complete and accurate disbursement information on a per project activity basis. As a result, adjustments have been made to data submitted by donor agencies for the 1992-1995 period, which slightly alters information reported in the previous Development Cooperation Reports.
  - (v) Many donors have implemented their programmes, either in part or entirely, through agencies under the UN system and/or through NGOs. In addition, a significant number of co-financing agreements are found with respect to funding made available by bi-lateral donor agencies for multi-lateral agencies and international financial institutions. To avoid "double-counting", the actual disbursements were validated and have been accurately reflected according to source of funds by donor, with amounts reflected under NGOs representing only "core (or own) resources".
