WILLIAM BERGSMA
(b. 1921)

Chameleon Variations (1960) (14½')

"The chameleon, of course, is an attractive little lizard that changes color to suit its surroundings. As a child I owned one, bought for a dime, with a chain around its neck. It was worn on the shirt-front, secured by a safety-pin; we besieged it with brilliant sheets of colored paper, and the poor thing tried its best."

"It seems to me, in retrospect, a good symbol of Variety with integrity, which is the intent of my CHAMELEON VARIATIONS."

-Wm. Bergsma
