THE BEGGAR’S OPERA (Act I)

Time and Place: 18th Century London

A washhouse in the slum area of London serves as the gathering place for beggars who come here at night for warmth. One of their members has written an entertainment which they perform for their own enjoyment. Using whatever props and pieces of costume the washouse affords they create the setting and the characters of the opera. Popular folk tunes of the day with new lyrics are interspersed with racy dialogue which satirizes prominent political figures, the professions, moral, religious and social conventions of the period. Italian opera which was much in vogue at the time receives particularly scathing attention.
