PROGRAM NOTES

WALKING TUNE was written in 1905 for a woodwind quintet and was published in 1912. It’s based on a melody written during a trip through Argyleshire, west Scottish Highlands, in 1900, and is one of Grainger’s most melodious tunes. Leopold Stokowski asked Grainger to expand the instrumentation to an orchestral wind section. Unfortunately it was not recorded subsequently.

GEORGE PERCY GRAINGER was born on 8 July 1882 at Brighton, Victoria. Quite precocious at an early age, Grainger made his first concert tour as a pianist when he was twelve. He became a close friend of Norwegian composer Edvard Grieg whose love of national music inspired Grainger to look closely at English folk music. With the aid of a phonograph, he collected songs from folk-singers.

RECOIL (2004) is the latest work by Schwantner for wind ensemble, following in the line of his three descriptive tone poems in this medium ... and the mountains rising nowhere... (1972), From a Dark Millennium (1981), and In evening’s stillness (1996). Recoil is a departure from the previous three works in that it is not based on poetic devices, but on a single descriptive term. The literal definition of the title (e.g. “to spring, shrink, or fall back”) has now become the motivic inspiration for music that rhythmically “springs away” from the typical rhythmic pulse of the metric structure. The result is a work that shifts between moments of stability and instability, creating a vehicle for musical virtuosity for the entire ensemble.

Recoil was commissioned by the University of Connecticut and the Raymond and Beverly Sackler New Music Foundation, and premiered on November 3, 2004 by the University of Connecticut Wind Ensemble, Jeffery Renshaw, conductor, in Carnegie Hall, New York City.

JOSEPH SCHWANTNER was born in Chicago (1943) and received his musical and academic training at Chicago’s American Conservatory and Northwestern University, completing a doctorate in 1968. He had a long and distinguished career in academia, serving on the faculty at Pacific Lutheran University, Ball State University, Eastman School of Music, the Julliard School, Yale University, eventually returning to and retiring from the Eastman School of Music faculty in 2000.

Schwantner has served as composer-in-residence with the Saint Louis Symphony Orchestra as part of the MEET THE COMPOSER/Orchestra Residencies Program. He has been the subject of a television documentary entitled, SOUNDINGS, produced by WGBH in Boston for national broadcast.

Schwantner’s many awards include the Charles Ives Scholarship from the American Academy of Arts and Letters in 1970, four National Endowment for the Arts grants between 1974 and 1979, first prize in the 1981 Kennedy Center Friedheim Competition for his chamber piece Music of Amber, and the 1970 Pulitzer Prize for his orchestral work Aftertones of Infinity. His work Magabunda “Four Poems of Agueda Pizarro,” recorded on Nonesuch Records by the Saint Louis Symphony, was nominated for a 1985 Grammy Award in the category “Best New Classical Composition,” and his A Sudden Rainbow, also recorded on Nonesuch by the Saint Louis Symphony, received a 1987 Grammy nomination for “Best Classical Composition.” He has also been a subject on the television series Soundings produced by WGBH of Boston. In May 2002 he was elected to the American Academy of Arts and Letters.

The longest running revival meeting in America took place on Azusa Street in Los Angeles, California and lasted from 1906 to 1909. Night after night, the Reverend William Seymour preached so passionately that he brought about an ecstatic outpouring from the congregation. They wept, shouted, and jerked uncontrollably. They dropped into dead faints. They spoke...
in tongues. They danced in the aisles. It is said that the Pentecostal movement in the United States was born of this three-year revival meeting.

*Holy Roller* is inspired by classic revival preaching. To me, revival sermons are stunning musical masterpieces of rhythm, tempo, and extraordinary tension and release. The music flows directly for the language, cajoling, and incanting, at the same time magnetizing and mesmerizing the listener with its irresistible invocations. The music is the language, the language is the music and the result transports the spirit to other states of being. *Holy Roller* is a revival sermon captured in the sounds of the alto saxophone and piano. (Libby Larsen)

Dr. Libby Larsen has been described as an "adventurous composer without being self-consciously avant-garde," and her music has been praised for its contemporary American spirit. As one of the most performed composers working today, her compositional output encompasses over 250 works for multiple genres ranging from solo vocal and chamber music to large-scale orchestra, wind band, and opera productions. She is able to work solely from commissions and has never held, nor sought, a full-time academic appointment.

Eminently respected for her commitment and authority on issues related to concert music tradition and music education, she is at the forefront of defining the composer's role in today's society. A highly articulate spokesperson, she has served as mentor, public speaker, writer, and advisor to many organizations including the American Symphony Orchestra League, Meet the Composer, the College Music Center, the Camargo Foundation of Music, ASCAP, and the National Endowment for the Arts.

Larsen is the first woman to serve as resident composer with a major orchestra, having held composer-in-residence positions with the Minnesota Orchestra, Colorado Symphony, and Charlotte Symphony. Additionally, she has held similar composer-in-residence postings with the Aspen Summer Institute, California Institute of the Arts, Arnold Schoenberg Institute, Philadelphia School of the Arts, and the Cincinnati Conservatory.

Dr. Larsen has been the recipient of numerous awards and wide critical acclaim including a Grammy as producer of *The Art of Arieen Auger*. She has been awarded a Lifetime Achievement Award from the American Academy of Arts and Letters, a Young Artist Award from the American Council on the Arts, fellowships from both the National Endowment for the Arts and the Bush Foundation, commissions from Meet the Composer/Readers Digest Lila Wallace Foundation, and numerous honorary doctorate degrees. (A composer's Insight, Linda Moorhouse)

**BANG!** begins with a musical statement that is clearly enough to explain its title. In fact, the entire first section of the piece is generated by repetitions of a cluster of drums as they continue to trigger the woodwinds into ever expanding and contracting lines before they ultimately fragment as new explosions emerge. Beyond this literal reference, the musical ideas and structure of this work are, in fact, inspired by the concept of the "big bang" theory in which the universe is constantly expanding having started from a single point. It seems that, like a rubber band, it may also begin to contract, at some point in the distant future, all the way back to that single point and even beyond! It is impossible to truly wrap one's mind around this but it is quite fascinating to try.

Above all this is a piece of music with melodies, harmonies, timbres, and rhythms that will hopefully excite, delight, frighten, amuse and perhaps even give comfort at times. It is not an attempt to represent such cosmic ideas as the "big bang". How futile that would be! However, these ideas do provide interesting musical analogies that can be heard in the outer sections of the piece. There are harmonic progressions, widely spaced chords that contract into tone clusters or move in the opposite way from the densest possible aggregate of notes to expanded structures that are more sonorous due to the open spaces between the notes. Chords and melodies thoughout the piece are constantly moving toward or away from each other at similar rates. Even the opening lines which provide the thematic basis for much of the work are always presented as at least two lines in mirror image which continue to move both higher and lower simultaneously. Percussive explosions are often the impetus for the bursts of energy created by the winds and brass.

Although the work is continuous, there are clearly three primary sections. The middle section is perhaps more humanly inspired as it features a full flute choir with bass and alto flutes playing a modal chorale interspersed with various solo instruments which play more expressive versions of the material that opens the work. However, even this tranquility becomes more restless as external forces continue to bombard and undermine it. The pent up emotion of the flute choir's plaintive song does reach full fruition however, before the drum cluster once again triggers an explosion, which this time expands even further in displays of musical fireworks and intensity. The final seconds of the work bring new meaning to its title if one considers it in the context of a slightly different theory postulated by T.S. Eliot in his poem *The Hollow Men*:

This is the way the world ends
Not with a bang but with a whimper.

David Kechley was born in Seattle and received the Bachelors degree in 1970 from the University of Washington. He completed a Doctorate in Composition at the Cleveland Institute of Music in 1979 where his teachers included Paul Tufts, James Beale, Robert Suderburg, William Bergsma and Donald Erb. Kechley's work reflects a wide variety of musical experience from popular to serial music. In particular, the visual and spiritual impact of his visits to temples in Kyoto, Japan in 1990 have had a profound influence on his musical thinking. He has received grants from the NEA and a Fellowship from the John Simon Guggenheim Memorial Foundation. He is currently chairman of the Department.
Florentiner March was originally titled “La Rosa di Toscana” by its composer Julius Fucik. For political reasons, he changed the title from honoring the entire region of Tuscany to glorifying just its capitol of Florence. Composed when marches were the popular music of the day, Florentiner March is regarded as an exemplary concert march. In addition, it has often also been labeled an operatic march due to its length and development of themes.

Fucik (1872-1917) was born in Prague and studied composition with Antonin Dvorak (1841-1904). In addition to composing, Fucik was bandmaster to the 86th Hungarian Infantry Regiment at Budapest. He is most frequently remembered as the composer of Thunder and Blazes (Entry of the Gladiators), most commonly known as the ‘circus entry’ music. This edition of Florentiner March was edited by Frederick Fennell in 1980.

Since moving to a house on a beautiful lake 17 miles west of Mt. Pleasant, Michigan, I have been witness to many striking sunrises. The window in our kitchen nook faces the east and I have often watched the sun come up over the lake. At first it peaks its bright red face from the tops of homes across the lake as it pushes its way through the cloudy haze of the horizon. Before long, it rises above the clouds and its rays spread brilliantly in all directions across the lake. It is a glorious moment as the beauty of the day is revealed. It is a miracle we take for granted and AT MORNING’S FIRST LIGHT seeks to musically depict this wonderful beginning of the new day. – David R. Gillingham

DAVID R. GILLINGHAM (b. 1947) earned Bachelor and Master Degrees in Instrumental Music Education from the University of Wisconsin-Oshkosh and the PhD in Music Theory/Composition from Michigan State University. Dr. Gillingham has an international reputation for the works he has written for band and percussion, with many of these works now being considered standards in the repertoire. His commissioning schedule dates well into the first decade of the 21st century. His numerous awards include the 1981 DeMoulin Award for Concerto for Bass Trombone and Wind Ensemble and the 1990 International Barlow Competition (Brigham Young University) for Heroes, Lost and Fallen.

Dr. Gillingham is a Professor of Music at Central Michigan University and the recipient of an Excellence in Teaching Award (1990), a Summer Fellowship (1991), a Research Professorship (1995), and the recently, the President’s Research Investment Fund grant for his co-authorship of a proposal to establish an International Center for New Music at Central Michigan University. He is a member of the Society of Composers International and ASCAP and the recipient of the ASCAP Standard Award for Composers of Concert Music in from 1996-2002.

Hermes: Swift of Motion is only one movement that make up Olympus: Four Mythological Legends. The piece takes its name from Mount Olympus and its movements were inspired by four characters from mythology. Hermes is known for his swiftness and athleticism, with wings on his helmet, sandals and on his magical wand Caduceus. He is messenger of the gods and the solemn guide of the dead, the Divine Herald who leads the souls to their last home. This is the shortest movement and embodies the flightiness of Hermes. The piece itself is a study of the elements that go with A♯ and its enharmonic G-sharp. Virtually every measure contains one of these two pitches.

ALDO RAFAEL FORTE is a composer with the United States Air Force Heritage of America Band at Langley Air Force Base and Adjunct Professor of Composition at Christopher Newport University, both in Virginia. He has studies composition with Ross Lee Finney, William Presser, and Robert Jager. He holds music degrees from Tennessee Technological University and the University of Southern Mississippi.

"While it remains open to question whether music can convey any message other than a purely musical one, composers often tend to attempt philosophical, pictorial, or other aspects within a musical framework. Such is the case with CACCIA AND CHORALE, two title words borrowed from Italian because of their allegorical significance. The first, Caccia, means hunt or chase, and is intended to reflect the preoccupation of most people in the world with a constant pursuit of materialism. The Chorale is, by contrast, an urgent and persistent plea for greater humanity, a return to a religious or ethical concepts."

[CLIFTON WILLIAMS]
"Caccia and Chorale is very much in the signature of Clifton Williams; however, the futility of the Caccia and its ultimate exhaustion into the Chorale bring us yet another dimension of this composer. As the Caccia continues its relentless pursuit of greater heights of frenzy, it is finally interrupted by a morse code-like figure (based on the symbols for D-E-G, drawn from the initials of Donald E. Greene—see below), which persist over the sustained block chords of what signals the futility of the 'chase' as Dr. Williams describes it. The material found in the Chorale represents some of the most powerfully emotional music to come from Williams' pen; not only in volume, but in the tension-maintaining harmonic structure which is as dramatic as any fortissimo climax found in any of his music. The music leaves one with a somewhat unresolved, restless feeling, although the final pianissimo chord makes every attempt to negate this through its musical consonance." [James D. Wayne]

Caccia and Chorale was commissioned by the State University of Wisconsin (Stevens Point) Wind Ensemble, Donald E. Greene, conductor.

**Lux Aurumque** began its life as an a cappella choral work I wrote in the fall of 2000. When the Texas Music Educators Association and a consortium of bands commissioned me to adapt it for symphonic winds, I rewrote the climax and included the grand 'Bliss' theme from my opera "Paradise Lost".

"Lux Aurumque" received its premiere at the 2005 conference of the Texas Music Educators' Association, and is dedicated with deep admiration for my dear friend Gary Green. [ERIC WHITACRE]

from the choral score:

After deciding upon the poem by Edward Esch (I was immediately struck by its genuine, elegant simplicity), I had it translated into the Latin by the celebrated American poet Charles Anthony Silvestri. A simple approach is essential to the success of the work, and if the tight harmonies are carefully tuned and balanced they will shimmer and glow.

*Lex Aurumque*

Light, Lux,
Warm and heavy as pure gold calida gravisique pura velut aurum
and the angels sing softly et canant angeli molliter to the
new-born baby. modo natum.

This score was commissioned by the Master Chorale of Tampa Bay, and is dedicated with love to Dr. Jo-Michael Scheibe

Born in 1970, ERIC WHITACRE received his M.M. in composition from the Juilliard School of Music, studying with John Corigliano and David Diamond. Today, Eric Whitacre is one of the bright stars in contemporary concert music, and has quickly become a much commissioned, published and performed choral and symphonic composer, as well as an accomplished conductor and clinician. In addition he also writes for the motion pictures and has a Grammy nomination to his name. Whitacre has received composition awards from ASCAP, the Barlow International Composition Competition, the American Choral Directors Association, and the American Composers Forum. In 2001 he became the youngest recipient ever awarded the coveted Raymond C. Brock Commission by the American Choral Directors Association.

Mr. Whitacre has already achieved substantial critical and popular acclaim. The American Record Guide named his first recording, "The Music of Eric Whitacre," one of the top ten classical albums in 1997, and the Los Angeles Times praised his music as "electric, chilling harmonies; works of unearthly beauty and imagination." His "Water Night" has become one of the most popular choral works of the last decade, and is one of the top selling choral publications in the last five years. "Ghost Train, his first instrumental work written at the age of 23, is a genuine phenomenon; it has received thousands of performances in over 50 countries and has been featured on 40 different recordings. His music has been the subject of several recent scholarly works and doctoral dissertations, and his published works have sold well over 350,000 copies world wide.

Internationally, Whitacre conducted the first in an annual series of wind symphony concerts in Tokyo, Japan, and was named music director of the Narashino Wind Consortium. He has conducted concerts of his choral and symphonic music in Japan, Australia, Singapore, much of Europe, and dozens of American universities and colleges.

The works of William Shakespeare undoubtedly have inspired more musical compositions than those of any other writer in the English language. Incidental music for the plays on stage, in film, and on television: settings of the songs, sonnets, and excerpts from the dramatic texts: overtures, tone poems, suites, and operas fashioned from the plays (sometimes just from the basic ideas or themes) and so on...the list is endless, and new works appear almost yearly. Composers of every nationality, style and temperament have found themselves fascinated at one period or another with the wealth of creative material in the Bard's pages. And there is every reason to believe that this will ever continue.

**OTHELLO,** A Symphonic Portrait for Concert Band/Wind Ensemble in Five Scenes (after Shakespeare), is a concert suite. Each movement characterizes musically the mood or feelings generated by a scene from the play, and is prefaced by a quotation from the text itself.

The second movement, Aubade (Cyprus), is a morning song, or serenade, played by itinerant musicians under Othello and Desdemona's window (Act III, Scene I), titled, appropriately, "Good morning, General." The third, Othello and Desdemona Portrays the deep feeling between them, passionate yet tender, and is prefaced by a quotation from Othello's famous speech...
to the Venetian Senate in Act I, telling of his wooing her: "She loved me for the dangers I had passed, and I loved her that she did pity them." The fourth movement, The Entrance of the Court describes a majestic triumphal scene.
